

DIP Switch settings for the M2.Connect for MOST can be found in the tables below. This document is not a complete compatibility chart. For up-to-date vehicle compatibility please consult our website.

Use a small screwdriver to change the DIP switches on the M2.Connect. The unit will automatically reset with the new settings. In some vehicles it may be necessary to remove the key and allow the vehicle to sleep (lock doors and wait 10 minutes), to ensure that the head-unit restarts and recognizes the new device.

Bluetooth Audio Streaming Configuration:

DAB : In regions with DAB digital radio, the M2.Connect will emulate a DAB tuner. Bluetooth Streaming can then be accessed via the DAB tuner menu of the head unit.

Sat Radio: The M2.Connect will emulate a Satellite Radio Tuner. Bluetooth Streaming can then be accessed via the Satellite Radio menu of the head unit.

CD-Changer: The M2.Connect will emulate a CD-Changer. Bluetooth Streaming can be accessed via a virtual CD in the CD Changer menu of the head unit.

	ASK (E65) / Early MASK 2004 E60	ECE		✓

NOTE: DAB Option is **only** available in markets that support DAB radio. If you are in a market that does not support DAB, this function will not work.
 NOTE:NON-MP3 CD Changer streaming interface is only recommended for Radios that do not support CD-Text (eg early versions of CCC/MASK and the E65 ASK). No Metadata will be available using this mode.
