

mObridge Product Features

Product Series ▶ M2.Connect ▶ MOST® & CAN Bus Bluetooth

The mObridge Bluetooth Interface is the most advanced after-market Bluetooth interface available for many MOST & Can bus vehicles. It allows the use of the vehicle's factory controls and head unit, to control and browse the functions of your mobile phone. By utilizing Parrot Bluetooth Technology, mObridge offers Best-In-Class telephone support with approximately 1,000 supported devices. The M2.Connect also allows full Bluetooth streaming and control as well as Android & Apple apps for software automatic updates and audio parameter adjustment.

Features Include

STEERING WHEEL COMMANDS

Allows you to control Bluetooth functions from the steering wheel controls equipped with the vehicle.

PLUG & PLAY HARNESS READY

All components needed to connect and power the mObridge to your vehicle are supplied in this kit.*

IPHONE & ANDROID APP

iPhone & Android App Integration for software update and audio parameter adjustments.

PHONEBOOK

Access to phonebook entries & call lists. Caller ID Display, manual dial and phone book dial.

FIRMWARE UPGRADEABLE

Using the mObridge WIZARD, creates a gateway to change the specification of the mObridge unit. This ensures optimal performance and the latest vehicle compatibility.

PARROT

mObridge Bluetooth products feature a digital Parrot chipset for superior phone compatibility and audio quality.

MOST

mObridge is a licensed supplier of MOST technology.

BLUETOOTH

mObridge is a certified member of the Bluetooth Special Interest Group.

*An adaptor maybe required.
